

N300 HDD Compatibility Information

Overview

Toshiba's Internal Hard Drives for Network Attached Storage (NAS) have been compatibility tested by certain NAS system providers in terms of compatibility e.g. with host bus adaptors, controller cards, enclosures and systems. Toshiba Corporation including its affiliated companies makes no warranty, implied or otherwise, and cannot be held liable for such statements made by the respective NAS system providers regarding the compatibility, performance, or reliability of its Internal Hard Drive when used with these NAS systems.

NAS System Providers

The following NAS system providers have published the results of their compatibility tests on their respective product websites*¹:

- [QNAP Systems, Inc.](#)*^{1, 3}
- [Synology Inc.](#)*^{1, 3}

Compatibility Guides:

For the following Internal Hard Drives for NAS compatibility test results of NAS system providers are available:

High-Reliability Hard Drive N300 *²

- HDWN180xxxxx
- HDWN160xxxxx
- HDWQ140xxxxx

Contact Toshiba Regarding Compatibility:

Irrespective of the third party compatibility test results mentioned above, Toshiba performs and supports interoperability testing between Toshiba's storage products and certain NAS system providers' systems. This may include 1) performing problem duplication and resolution of related issues in complete systems, 2) performing compatibility testing of new Toshiba products and new firmware releases, and 3) performing benchmarks to ensure quality and performance.

In addition, Toshiba is involved in numerous standards committees and designs its storage products to work with other combinations of industry standard hardware and software.

For Toshiba customers, please contact your local Toshiba Customer Support Center.

Remarks:

*¹ Third parties' websites linked to or from this website ("linked third parties' websites"), except those of group companies of Toshiba, are administered by such third parties at their own responsibility. Provision of a link to and from this website does not imply that Toshiba has any special relationship with parties operating linked third parties' websites or that Toshiba recommends the contents of linked third parties' websites. Toshiba assumes no responsibility for the contents of linked third parties' sites or use of such sites.

*² The manufacturer type designations listed above refer to individual Toshiba Internal Hard Drives designed for NAS operations. However, please be aware that NAS system providers have not evaluated all products belonging to a particular series but only individual products of a respective series, and NAS system providers have evaluated not all functions of Toshiba Internal Hard Drives for NAS operation.

*³ The designations of the NAS system providers listed above may be protected by name rights, trademarks or other relevant law.
